(a) Isotropic, $k_B b_s = \pi$

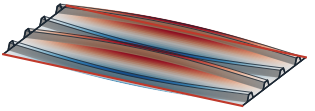

GBT: 75.09 N/mm
Abaqus: 75.32 N/mm
(dots), MAC 1.0000

cross-section at $X/L = 0.50$

(b) Sym1, $k_B b_s = \pi$

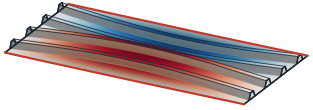

GBT: 5.20 N/mm
Abaqus: 5.22 N/mm
(dots), MAC 1.0000

cross-section at $X/L = 0.50$

(c) Isotropic, $k_B b_s = \pi/2$

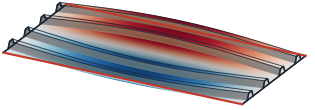

GBT: 88.11 N/mm (double)
Abaqus, eig. 2 = 3: 88.67 N/mm

cross-section at $X/L = 0.50$

(d) Sym1, $k_B b_s = \pi/2$

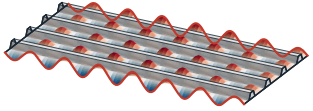

GBT: 5.98 N/mm (double)
Abaqus, eig. 2 = 3: 6.02 N/mm

cross-section at $X/L = 0.50$

(e) Isotropic, $k_B b_s = 0$

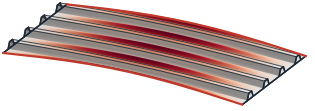

GBT: 121.02 N/mm
Abaqus, eig. 4: 122.33 N/mm

cross-section at $X/L = 0.46$

(f) Sym1, $k_B b_s = 0$

GBT: 14.25 N/mm
Abaqus, eig. 4: 14.35 N/mm

cross-section at $X/L = 0.50$

normal displacement $w/|w|_{\max}$
